INDEX '09

MET094 M&M

This soft, flexible wire cloth, a wire and doesn't fray. M&M can be used with several metals: Stainless steel Aisi 304, Brass, Bronze or a mix of these kind of wires. New technology solutions make the material durable, allowing it to be used for a multitude of decorative and technical applications for designers, product developers, packaging engineers, decorators or product engineers. The material has contrasting textures when touched: is soft/rough or smooth/rimmed and 3 renders evocative and luminous any atmosphere.

Material Sensorial

glossness	Gloss
translucence	0
structure	Dye
texture	Medium
hardness	Hard
temperature	Cool
acoustic	Pair
odour	None
